# YOUR *FAST TRACK* TO HIGHER REVENUE & GREATER SUCCESS!

## SYSTEM INTEGRATION

The heart of the IQ Express System is the IQ 2.0 (Soft Touch or Touch Free) with its precision cleaning, exceptional wash flexibility and smart management platform. Next, key components expand options and capacity while enhancing the customer experience. These include post application arches, tire shiner, dryers, lighted instructional signs and pump room support equipment, all fully integrated into one control system.

This means the programming and communication necessary for proper sequencing, timing, and flows among the components are pre-established and centrally controlled within the IQ Express Interface.

### IQ EXPRESS WASH OPTIONS

(up to 8 wash options may be offered)

Undercarriage - ST & TF

Bug-Off - ST & TF

Pre-Soak or Detergent 1&2 - ST

2-Step Pre-Soak - TF

- TSS Protectant Arch
- TSS Spot Free Arch
- Gloss Boss Tire Applicator System

### EQUIPMENT OPTIONS & UPGRADES

- Dryer System
- TSS Casino Arch(es)
- TSS Commander Signs

# WHY IQ EXPRESS

IQ Express is the perfect solution when you need additional wash capacity to handle higher potential volume than traditional in-bay automatic sites. If your car wash is experiencing longer and more frequent peak periods resulting in extended customer wait times, the IQ Express offers a fast track to higher revenue. And, your cost to build and operate an IQ Express is substantially lower than any type of Tunnel Wash.

Read on to learn more about specific traffic and space requirements as well as performance metrics and additional benefits of the IQ Express.

## A fully integrated, multi-function system to unleash the revenue potential of your high-volume car wash!

- 
**INCREASED THROUGHPUT**  
 Express allows for two vehicles in wash cycle simultaneously; offers potential of washing 52% more vehicles per hour.
- 
**HIGHER REV PER VEHICLE**  
 The enhanced in-bay experience of rinse curtain and protectant arches and coordinated lighting effects offer an opportunity for a higher price point on premium washes.
- 
**MORE MENU OPTIONS**  
 Express provides more add-on and upsell menu options, including Tire Shine, to attract customers and compete against Tunnel Washes.
- 
**DECREASED WAIT TIMES**  
 Dual vehicle throughput cuts average wait times in half and increases customer satisfaction even during the busiest times of the day.
- 
**LOWER COSTS**  
 The cost of land, equipment and installation for IQ Express is a fraction of that for a typical Tunnel Wash. Operating expenses are lower as well, combined with greater income potential, IQ Express offers the best opportunity for a healthier bottom line.
- 
**REDUCED COMPLEXITY**  
 Compared to a Tunnel Wash, an IQ Express requires far less space, maintenance, and virtually no on-site labor. Plus it can operate and generate revenue on a 24/7 basis.

## Revenue Generating Power IQ Express Wash *versus* Standard-In Bay Automatic

Standard In-Bay Automatic Wash      IQ Express Wash

Based on data and analysis from multiple commercial car washes (Express and IBA) as well as industry sources and calculated estimates.
